

## Technical Data Sheet

### Colour fastener

- › Prevents the transfer of colours during the wash cycle
- › Inhibits the re-deposition of unfixed colour in the wash liquor
- › Remedy damage caused by colour transfer (if unfixed)

**Biocolor**

## Technical Data Sheet

Method of use: Dose 1 – 2 ml of Biocolor per kg of dry garments in the main wash, independent of water hardness and washing temperature.

To remedy colour transfer, add 30ml of Biocolor together with 5ml of a mild detergent per litre of warm water. Leave the garments to soak for 30-60 mins, occasionally stirring the garments by hand. Wash the garments again as normal.

Do not exceed recommended dosage.

### Technical features:

pH 1% = 7,0 – 8,0  
Density 20°C = 1,050 - 1,100g/ml

**Biocolor**
